

International Project Week

28TH
edition

New ideas
for your
company?

→ saxion.nl/projectweek

January 26 - 30, 2026

What is the International Project Week?

Approximately 150 student teams from technical and economic degree programmes will work for one week on company projects. They do this together with pupils from secondary schools and guest students from international schools and universities. At the end of the week, all groups present the results.

Wanted: project assignments

Are you looking for fresh ideas and initiatives for your company? Or do you want the students to work on a completely new concept? Let students work on these issues from an interdisciplinary perspective! In addition, you will come into contact with over 1.200 students during the closing event; the future of your business.
